FuelMaker Natural Gas Vehicle Refueling Station

MINI PUBLIC-ACCESS CNG STATION

The solution to building a viable natural gas public fueling infrastructure.
Ideal for sites where a large station would exceed fueling demands.
Satisfy the need for a sustainable infrastructure at half the cost.

Basic Package

FuelMaker's basic Mini Public-Access CNG Station package can produce 130gge* per day, satisfying the immediate CNG fueling needs of approximately 25 vehicles/day.

Comes complete with:

- 2 Multiple Compression Module Units (FMQ-7-42 VRAs)
- 1 Single Hose Dispenser
- 1 Card Reader
- 2 Low Pressure Tower Dryers
- 8600scf of Storage (approx. 70gge)

**gge - gasoline gallon equivalent*

An increase in fuel demand can be met by adding compression and/or storage to the station.

FuelMaker, For All Your Refueling Needs

Advantages & Benefits

Affordable, convenient complete package design

All components required to provide public access fueling infrastructure

Weights and measures certified dispenser

Meets all nationally recognized codes and standards

Oil free compression ensures non-contaminated fuel delivery

Compact footprint and quiet operation - can be installed in a variety of locations, including noise sensitive areas
